Erosion Control Notes:

1. Construction is intended to implement the BMPs that exist at this location. The implementation of these BMPs is required to prevent erosion and sedimentation. The contractor shall be responsible for maintaining the BMPs during and after construction.

2. Failure to install, operate, and maintain all erosion control measures as required and/or specified will result in all work on the construction site being stopped until proper corrective measures have been met, as required and/or specified.

3. Additional erosion and sediment control measures will be installed if amendments/ revisions to the ES&PC plan which have a significant impact or result in an impairment of water quality, are not implemented.

4. The project may result in all work on the construction site being stopped until proper corrective measures have been met, as required and/or specified.

5. The contractor shall be responsible for maintaining the BMPs during and after construction.

6. The project does not provide for effective erosion control.

7. Design professional.

8. The project does not provide for effective erosion control.

9. The contractor shall be responsible for maintaining the BMPs during and after construction.

10. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

11. The project does not provide for effective erosion control.

12. The contractor shall be responsible for maintaining the BMPs during and after construction.

13. The project does not provide for effective erosion control.

14. The contractor shall be responsible for maintaining the BMPs during and after construction.

15. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

16. The contractor shall be responsible for maintaining the BMPs during and after construction.

17. The project does not provide for effective erosion control.

18. The contractor shall be responsible for maintaining the BMPs during and after construction.

19. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

20. The project does not provide for effective erosion control.

21. The contractor shall be responsible for maintaining the BMPs during and after construction.

22. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

23. The project does not provide for effective erosion control.

24. The contractor shall be responsible for maintaining the BMPs during and after construction.

25. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

26. The project does not provide for effective erosion control.

27. The contractor shall be responsible for maintaining the BMPs during and after construction.

28. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

29. The project does not provide for effective erosion control.

30. The contractor shall be responsible for maintaining the BMPs during and after construction.

31. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

32. The project does not provide for effective erosion control.

33. The contractor shall be responsible for maintaining the BMPs during and after construction.

34. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

35. The project does not provide for effective erosion control.

36. The contractor shall be responsible for maintaining the BMPs during and after construction.

37. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.

38. The project does not provide for effective erosion control.

39. The contractor shall be responsible for maintaining the BMPs during and after construction.

40. All work on the construction site shall be stopped until proper corrective measures have been met, as required and/or specified.
